The Honorable John A. Boehner Speaker U.S. House of Representatives H-232 US Capitol Washington, DC 20515 The Honorable Nancy Pelosi Democratic Leader U.S. House of Representatives H-204 US Capitol Washington, DC 20515

Dear Speaker Boehner and Representative Pelosi:

The undersigned organizations reaffirm our commitment to work with Congress on the shared goal of delivery and payment reform in the Medicare program to promote high-quality, high-value, and better coordinated care to our patients. To reach this goal, adequate and stable investments are necessary so that physicians can modernize their practices to support the coordinated care that will improve health and prevent costly complications, and enable the participation in new payment and delivery models.

As we approach the new year, physicians are faced with the discouraging prospect that our shared goal will be undermined due to the increasing level of uncertainty in the Medicare physician payment system. Looming among the myriad potential barriers to implementing improvements is the two percent Medicare provider payment cut called for under the Budget Control Act's (BCA) sequestration provision. The combination of a sequestration cut and looming Medicare Sustainable Growth Rate (SGR) payment cut would not only impede improvements to our health care system, it could lead to serious access to care issues for Medicare patients as well as employment reductions in medical practices. We strongly urge Congress to work diligently during the fall to reach a bi-partisan agreement to pass legislation nullifying the Medicare physician payment cuts called for under the BCA's sequestration provision and the SGR formula. Sequestration also will result in across-the-board cuts to a wide range of essential programs to ensure high quality and accessible patient care, and we believe that Congress should not abdicate its responsibility to deliberate and make policy decisions on what is important and needs to be funded.

The BCA's Medicare cuts could not occur at a worse time. Medicare physician payments have been nearly frozen for a decade, while the cost of caring for patients has increased by more than 20 percent. Congress still has not revealed a clear plan for addressing the 27 percent cut in 2013 called for by the Medicare SGR formula. While these cuts alone will be devastating to physician practices and patient access to care, physicians are also facing present and future financial penalties if they do not successfully participate in multiple Medicare programs, including the e-prescribing program, the electronic health record meaningful use program, and the Physician Quality Reporting System, as well as the value-based modifier.

Congress has a responsibility to ensure that sufficient funding is available to sustain adequate payment for medical services provided to our nation's seniors and disabled populations under the Medicare program. The status quo is unsustainable, and will do considerable harm to the Medicare program as well as the broader health care delivery system.

We understand that our nation faces significant fiscal challenges; however, these cuts will undermine efforts to achieve broader, long-term reforms to the Medicare program.

Sincerely,
