

How to Use the Menu

The menu icon is in the upper left corner of the screen regardless of where you are in the application. (In this case, the Messages feature is active.)

Tap the **menu icon** with your finger to display the menu.

The feature you were using (Messages, in this case) slides to the right and displays the menu on the left side of the screen. Tapping a menu option will open that feature.

Menu Items

- **Messages** – enables you to create and access DocbookMD communications
- **Favorites** –provides a shortcut to physicians and pharmacies you have identified as favorites
- **Specialties** – displays a searchable list of medical specialty areas
- **Physicians** – displays a searchable directory of physicians in your medical society
- **Pharmacies** – displays a searchable directory of pharmacies in your geographic area
- **Physician Groups** – displays a list of named groups in your medical society
- **Refresh Data** – implements recent updates in your medical society’s database
- **Options** – is an interface that allows you to make choices about the app functionality
