II.

HEALTH ACCESS AMERICA

Whereas, the American Medical Association recognizes the serious problems facing our health care system, and

Whereas, these problems cannot be solved by any one organization or segment of society, and

Whereas, it's going to take a national discussion to resolve these critical health care issues, and

Whereas, the American Medical Association is attempting to solve some of the problems in our health care system with the Health Access America proposal, and

Whereas, the AMA is working on this proposal with Congress and the administration to find solutions that must:

- Preserve individual freedom of choice.
- Provide affordable coverage for all Americans, regardless of income.
- Assure continued access to affordable health care by the elderly.
- Deliver high quality of care at appropriate costs.
- Continue each physician's commitment to the highest ethical standards.
- Promote medical technology and leave science free to conduct research in the best interests of the patient.
- Continue to produce highly trained and competent physicians.
- Allow medical professionals to act as patient advocates and not as agents of government or industry.
- Bring real and necessary changes, providing access to superior health care for every American; therefore be it

Resolved, that the New Hampshire Medical Society support the AMA in its efforts to find solutions through its Health Access America proposal.
