

May 27, 2014

The Honorable Bobby Jindal
Office of the Governor
P.O. Box 94004
Baton Rouge, LA 70804-9004

Dear Governor Jindal,

The 108 undersigned organizations representing physicians across the state and the country are writing to express our serious concerns over House Bill 1065 by Representative Rogers Pope, and respectfully request that you veto the bill.

Put Patients First!

HB 1065 gives optometrists open-ended authority to perform almost any surgical procedure. Many people believe that expanding the scope of practice of non-physicians equates to increasing patient's access to care. Sadly, increasing access to inadequately trained providers only fosters a two-tiered system of care that threatens overall patient safety. Furthermore, some patients may be under the false impression that they are receiving care from a physician, which increases the likelihood that they suffer unnecessary complications instead of seeking an accurate diagnosis by an expertly trained physician.

Our patients deserve the best care - not just "good enough" care. This bill authorizes optometrists to perform procedures using multiple methods and instruments including scalpels, lasers, needles, ultrasound, ionizing radiation and by burning and freezing tissue. Optometrists do *not* have the training to perform these procedures or manage the complications that can arise with these procedures.

Furthermore, optometrists performing these procedures would be the *only* profession allowed to perform surgery outside the purview of the Louisiana State Board of Medical Examiners (LSBME). Every other surgical procedure in the state falls under the regulation of the LSBME to ensure patient safety— why should optometrists be allowed to practice without this same oversight?

In closing, we urge you to veto HB 1065 to ensure patient safety and protect the good health of the citizens of our state. Your thoughtful consideration of this issue is appreciated.

Sincerely,
