

Increased Primary Care Services Rates

Available *only* to qualified physicians and advanced practice providers meeting the requirements of 42 CFR 447.400(a)

The Affordable Care Act (ACA) authorized Medicaid reimbursement of primary care physicians at parity with Medicare for calendar years 2013 and 2014. The purpose of this rate increase is to increase physician participation in Medicaid and increase support for those physicians already participating in Medicaid.

The following list contains the CPT codes (for E&M and vaccine administration) that will be reimbursed at the enhanced rates for 2013 and 2014. In order to receive these rates, providers will be required to complete an attestation form.

Further information for primary care providers will be posted on this website and that of the NH Medicaid MMIS (Xerox), including:

- the ACA criteria providers must meet to be eligible;
- the attestation form with instructions on where to submit it; and
- when and how NH Medicaid will reimburse providers.

Office of Medicaid Business & Policy will also notify providers via E-mail when this information is available - watch for a communication from NH Provider Relations at Xerox.

Procedure Code	Current Medicaid Rate (The rate that providers will receive when they submit their claims)	Increase In Rate (The additional amount that providers will receive via a separate payment calculated by DHHS and paid on a quarterly basis)	New Calculated Rate (Applies to dates of service on and after 1/1/13 and ends COB on 12/31/14, and reflects the rate with the increase included)
